

› Retail

What's in style this season? **The bottom line.**

In challenging economic times, you need a partner that sees opportunity in adversity. Zanett has supported many leading retailers in solving mission critical issues that face all retailers. Profit margin is precious and even in this economic environment there are opportunities to impact the bottom line. Many retailers have an opportunity to optimize inventory levels based on customer demand. Some have the opportunity to improve collaboration with suppliers and other partners. Still others have the opportunity to refine employee lifecycle processes- from managing seasonality to retaining and developing your best talent. Zanett's solutions help our retail clients to identify these opportunities and implement the ones that offer a return on your investment.

- › From business consulting to enabling technologies, Zanett has supported our retail clients for over decade. We help them identify opportunities to improve processes and utilize technology to deliver Real Enterprise Value™ and impact the bottom line. Our solutions reduce costs, create efficiencies, or support growth initiatives. For most retailers, technology is a strategic enabler that helps you achieve your goals in delivering value to the enterprise. Zanett supports Oracle E-Business Suite, PeopleSoft, and JD Edwards for ERP. We also support Demantra for demand management and sales and operations planning. We support enterprise application integration with Oracle Fusion Middleware and SOA technologies.

› Designer Labels

We offer a range of solutions to address the core processes that drive value in retail organizations:

- › Demand Planning
- › Inventory Accuracy
- › Collaborative Supply Chain
