

# › Project & Program Management

## Managing Solutions to Help your Business

Most companies feel the pain of inadequate project management – 72% of all IT projects are late, over budget, lack planned functionality, or do not meet customer expectations. Through adopting Zanett’s agile project/program management methodology that focuses on the business issue, you increase project success.

### › Why “Project / Program Management”?

- › You need a better process for ensuring projects are properly initiated, clearly defined, and accurately planned
- › You need a strong project leader for a mission-critical project
- › You need to “save” an important project before it is too late
- › You do not have a consistent approach for delivering successful projects
- › You need a better process for managing and utilizing resources
- › Your product development, project management, quality assurance, and compliance processes are not efficiently and effectively integrated

## WHY Zanett?

Zanett helps our clients align business objectives with technology to create Real Enterprise Value™. We help plan, build and manage the business applications that you rely on to run your business. Our unique combination of depth and breadth in functional experience combined with our industry expertise creates tremendous value for our clients.

### › Key to Improving Organizational Performance is Constantly Delivering Successful Projects

Whether you need strategic project management and oversight for a critical project or management of your portfolio of projects, our services will deliver results while developing your employees for future success.

#### **Portfolio Management**

It is imperative to your organization that approved project initiatives align with your business objectives. A standardized approach to the submittal and tracking of project requests will enable you to have greater control over the prioritization and scheduling of such initiatives. Our portfolio management services will maximize project investment decisions of constrained resources.

#### **Strategic Project Management and Oversight**

Project success is ultimately determined by how well your project is managed. With a mature and agile methodology in place, your ability to successfully deliver new or turnaround failed projects will be greatly enhanced. Adopting the appropriate methodology framework will also enable you to improve your project planning, implementation, monitor and control, and close-out processes.

#### **The Zanett Difference**

Our program/project managers are more than certified practitioners; they are business solutions architects with years of experience in successfully running large and complex IT projects. Our professionals will partner with your organization to develop “best-fit” solutions to improve your internal project management capabilities. Allow us to demonstrate value through consistent methodologies, proven processes, best-fit tools and highly experienced, knowledgeable people.
