

› Managed Services

Ensuring your Oracle systems are up and running efficiently while trying to keep your security, patches, hardware, and everything else needed to manage your systems up-to-date costs a lot of time and money. The demands placed on your capital and staff just to keep things operating, reduces efficiency, and limits your opportunities for growth.

› Oracle just got A LOT easier

Zanett's Managed Services for Oracle is an innovative approach to IT management that offers an affordable alternative to traditional in-house operations. Whether we host your data in our state-of-the-art datacenter or manage it for you remotely, Zanett has a solution for you. Our Managed Services don't replace your valuable IT staff – it augments them. By utilizing our staff of highly trained DBAs to provide 24/7 proactive monitoring, patching, clones, upgrades and more, yours will finally have the time to focus on your organization's core strategic business initiatives. With Zanett's Managed Services, you are guaranteed a higher level of management that affords you higher availability, improved security, increased performance, faster issue resolution, and access to the latest technology. All of your IT requirements are covered with Zanett's extensive technology expertise. We are committed to ensuring your organization succeeds by offering engagements to suit your needs in the areas you need them, when you need them.

WHY Zanett?

Zanett helps our clients align business objectives with technology to create Real Enterprise Value™. We help plan, build and manage the business applications that you rely on to run your business. Our unique combination of depth and breadth in functional experience combined with our industry expertise creates tremendous value for our clients.

› Safe, Fast, Reliable, Economical

Zanett's Managed Services for Oracle Solutions is the easy way to get the power of Oracle at a price you can afford. Employing managed Services for Oracle save 44-66% annually compared to related in-house IT expenses by lowering technology costs, enhancing productivity, and streamlining business processes.
