

## Governance, Risk and Compliance

### Compliance Automation in 60 Days

Today's enterprise needs to comply with international, federal and state mandates, follow corporate best practices and maintain client and investor confidence. Zanett helps you put continuous auditing and compliance processes and controls in place to safeguard your organization's critical data.

Our solution provides such benefits as:

#### **Risk Reduction**

Zanett's solution determines which application information should be monitored and identifies weaknesses against current controls, rules and policies.

#### **Verifiable and Trusted Audit Trail**

Receive up-to-date information about which application function has been accessed, by who, and when, and what changes occurred as well as an accounting of before and after values of all audited data.

#### **User Management**

Easily identify changes made by all types of application users as well as the impact of any changes to application integrity.

#### **Policy Violation Notification**

Receive automated alerts of policy violations and improper actions, as well as drill down capabilities to investigate and mitigate risk.

#### **Database Updates and Scripts**

Track changes including ones that may occur if they are changed by a database script or other database merge or update from other systems.

#### **Automated Regulatory Compliance Reporting**

Utilize report templates that are automated by established Zanett rules, policies and controls.
