

LIFE SCIENCES SOLUTIONS

Integrate, Assure and Inform the Value Chain from R&D through Production

Life Sciences organizations are facing an increasing number of challenges. From getting products to market as efficiently as possible to meeting the most stringent of FDA and SEC regulatory requirements. Managing all of the moving parts requires solutions that integrate the entire value chain – from research and development through production. Zanett partners with leading Life Sciences organizations to deliver these solutions that drive your business forward.

Our Solutions

Enterprise Resource Planning

- ▶ Oracle E-Business Suite, PeopleSoft and JD Edwards (over 400 full life-cycle ERP implementations and Oracle Platinum Partner across all ERP products and modules)
- ▶ Human Capital Management: Performance, Talent and Position Management; ELM
- ▶ Finance: COA Consolidation
- ▶ Supply Chain Management: Logistics and Planning, Mobile Supply Chain
- ▶ OPM: Process Manufacturing with integration to third parties

Governance and SOA

- ▶ Connect disparate systems and processes within a facility or across facilities (and monitor)
- ▶ Eliminate duplication and redundancies in data
- ▶ Improve quality of data
- ▶ Expedite billing and payment
- ▶ Enable superior compliance under the Sunshine Act

Clinical Trials: Data Capture & Integration

- ▶ Validated & secure repository for clinical data
- ▶ Structured business processes for integrating clinical, safety and other types of information
- ▶ Pooling of data as well as analysis, reporting and data mining in one integrated environment
- ▶ Enables streamlining of business processes around acquisition, analysis and reporting of data by providing workflow capabilities
- ▶ Lowers IT costs by consolidating data and enabling retirement of legacy systems
